

Our innovative half-turn filter housings  
make change-outs a snap.  
No wrench required!

## nuvoH2O *under-the-sink* Carbon Water Filter System

The nuvoH2O under-the-sink Carbon Water Filter System can remove up to 95% of volatile organic compounds (VOCs) such as MTBE, total organic carbon (TOC), chlorine, dissolved and particulate lead, parasitic cysts, and strange colors in your drinking water with our 5 micron filter.

### Features:

- Easy half turn removal of the base for filter replacement
- High quality, rugged, versatile
- Custom double O-ring seal
- Working pressure up to 100psi
- Max Temp is 150° F
- Available 1/4" or 3/8" NPT connections
- Mounting bracket for easy installation
- No wrench required
- 5-micron carbon filter
- 6 month limited warranty
- Made in the **USA**

### Installation instructions:

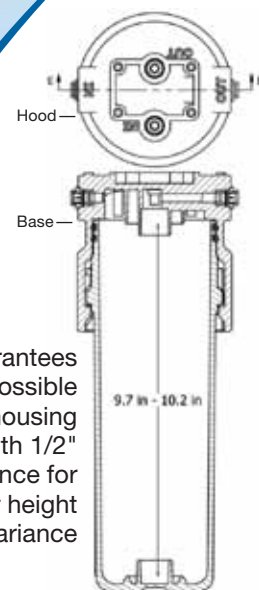

- Turn off water under sink
- Mount housing hood under the sink using the mounting bracket provided
- Hook up water lines into the 1/2" fittings
- Insert carbon filter into the base and press up into the hood and turn a half twist counter clockwise
- Turn on water and check for leaks

### Cartridge replacement instructions:

- Turn off water under the sink
- Turn sink faucet on to release any built up pressure
- Press base up into hood and turn a half twist clockwise to release (Caution-housing will be full of water)
- Replace carbon filter every 1350 gallons (approximately 6 months)
